

# DPK AUDIO DOOR ENTRY SYSTEM

- Analogue System
- Multi-Way
- Simple & Reliable

## Product Overview:

The DPK Audio Door Entry System is a straightforward analogue solution designed for residential and multi-occupancy buildings. Using a traditional multi-core wiring system, it provides reliable audio communication and door release functionality. Available in configurations from 1 to 20 call buttons, it is well suited to both new installations and the replacement of existing analogue systems.

## Key Features:

- ▶ Analogue multi-wire door entry system
- ▶ Configurations from 1 to 20 call buttons
- ▶ Clear audio communication with handset operation
- ▶ Aluminium door station for internal and external use
- ▶ Surface or flush mounting options
- ▶ Simple installation using multi-core cabling
- ▶ Compatible with electric strikes
- ▶ Suitable for new installations and retrofit projects

## Kit Contents:

- ▶ Door entry panel (DPK aluminium station)
- ▶ Telephone handsets (per system configuration)
- ▶ Power supply / amplifier (NH200TV)

## Technical Summary:

Specification	Details
System Type	Analogue audio door entry
